May I urge you to settle the Microsoft case as soon as is possible. From my viewpoint, Microsoft has provided great benefit to the consumer, and all the anti-trust actions are a grave injustice to Microsoft. I am convinced that the growth of the PC market and business is largely due to the fact that Microsoft provided a 'standard' software which enabled all of us to work on the same wave-length. Let's continue to have America reward those that provide the most benefit to the nation---not arbitrarily reduce everyone to the 'lowest common denominator'.

Thank you.

T. P. Higgins,
